Hi Prashant

Please refer to Amadeus email before concerning the bonus_act table in Replica

Please advise urgently if the table exists and changes to the data type can be made

Best Regards,

SUGUMAR MUNIANDY

Subject: MH RBA Replica -- Rule ID field

INFO: This email is sent from a whitelisted sender or email server outside of MAG

Hi Hirda,

As you may now that, in replica there is a file which we are sending to you as bonus_acts. In this file there is rule_id field. You can see specifications in below screenshot. Currently in PROD we are sending this as number to you without character limit.

However with RBA enhancement, after calling LCP this field now changing as string since we are not receiving numbers, we are receiving letters.

So this number field changed to varchar(50). Maximum data length can be 50 characters.

Unfortunately we need you to change this on your side as well. Otherwise you may not be able to insert the bonus_acts records on your side.

Could you please check with your related team as soon as possible before cut-over?
